KEY INVESTOR INFORMATION DOCUMENT

Octagon Money Market Fund (USD)

Description

The Octagon USD Money Market Fund is designed to provide a reasonable level of current income while achieving steady capital growth through the compounding of earned income. The Fund is managed in accordance with the investment guidelines prescribed by the Capital Markets Authority. It is suitable for investors who wish to invest in U.S. Dollars.

Strategy and Objective

The objective of the Octagon Money Market Fund is to achieve short-term stability and steady capital growth through the compounding of interest while maintaining low investment risk and providing a reasonable level of current income. This approach ensures maximum stability and the preservation of the invested capital.

The Fund invests in interest-earning dollar denominated money market instruments. These instruments include Treasury Bills, Treasury Bonds, credit-rated private commercial papers, corporate bonds, and fixed and call deposits. This ensures a well-diversified portfolio while providing ease of liquidity for investors. All investments adhere to the limits in the Capital Markets (Collective Investment Schemes) Regulations, 2023.

Why Invest in this Fund?

- Liquidity:** Investors can easily access or redeem their invested funds within 2-5 working days.
- Security:** The fund manages risks through diversified investments across asset classes, focusing on low exposure to market fluctuations.
- Competitive Returns:** The Fund seeks to provide competitive returns through strategic asset allocation focused on generating interest income.
- Flexibility:** Investors may switch between Octagon Unit Trust sub-funds, subject to applicable terms.
- Professional Management:** The fund is managed by licensed investment professionals

Risks of Investing in the Fund

This is a low-risk investment fund. The fund is actively managed with exposure to interest rate, credit/default, liquidity and currency/forex risks. Risk management measures are applied to mitigate potential adverse effects; however, the returns are not guaranteed, and the value of investments may fluctuate depending on market conditions.
